COLEMAN, ALBERTA THURSDAY, SEPTEMBER 23, 1937

Harvest services, St. Alban's, Sunday 8 a.m., Holy Communion; 12:30 p.m., School day; 7 p.m., evensong. Rev. W. R. Jeffcott of Pincher Creek will conduct the services.

Southern Alberta Protest Meeting at Lethbridge To Be Addressed By E. Leslie Gray; Mayor Elton Chairman

Will Be Held To Make "Visible and Audible" Protest Against Aberration—Mayor Elton Chairman

Southwestern Alberta will converge on Lethbridge arena on Saturday evening next, September 25th, at 9:30, when the movement for the fusion of public opinion against the present Aberrant government at Edmonton will get under way in the South. The Lethbridge meeting is the third in the series being held throughout the province, the others having already been held at Calgary with more than 8,000 present, and Red Deer with 2500 present. Lethbridge is aiming to pack the arena with 5000 people on Saturday.

Speakers for the occasion will include D. M. Duggan, M.L.A. Conservative leader in Alberta; E. L. Gray, the new provincial Liberal leader; and a U.F.A. speaker with the probability of a speaker representing Labor interests opposed to the Aberrant theory of Social Credit. Mayor Elton, of Lethbridge, will occupy the chair and there will be a band in attendance to keep the proceedings lively.

HILLCREST MAN BEREAVED

John McDade, of Hillcrest, received word from Estevan that his cousin, William Lee, sustained fatal injuries from a cave-in at Pinto. Lee is the son of another joint owner of a mine at Pinto, were pulling operations when a great slab of clay fell. The latter, though sustaining a fractured skull and broken arm, was able to himself to drag his brother from the mass. Finding it impossible to do it alone, he drove to Pinto to summon help from the McLennan home, and then collapsed.

Your local weekly newspaper reflects the joys and sorrows of our community. It is a word, a note, in every sense of the word, aiming to serve and boost for Coleman. Its employees are part of the community and local taxpayers. It is well to remember this when solicited by outsiders for work which your local office is here to do.

PROVINCIAL LEADER

E. LESLIE GRAY

Nominated for the Edmonton by-election, who will lead all parties desiring to see a return to sane government in Alberta. Manager of the Eastern Irrigation District at Brooks he has carried on his principles of co-operation under the new leader in an effort to restore Alberta's credit as one of the nine provinces of Confederation and to expose and denounce the policies of the Aberrant and his extreme cabinet members.

John Brennen Writes a Letter; Gets a "Kick" Reading The Journal

A BREVET NOTE

John Brennen, formerly of the C.P.R. staff here, now agent at Emmons in forwarding his renewal subscription to The Journal, comments on local affairs such as schools, town council and other matters of import, and adds: "I note that Mr. Halliwell don't like the collection."

When John first began operator here he wired in many a string of hockey news hot from the local arena. Hockey matches were the occasions when John would be "all pep up," and if the local team won, he would be so elated he just sent the staff sizzling over the wires to Calgary and Lethbridge with plenty of steam behind it. He must miss those hectic battles, for he is no longer even player or born there. It is also of interest to note that the contractor who contracted to build the new Alberta Club is also a member of the Lethbridge Curling Club.

The bridge room belongs to an old and favorably known family in Sarnia. His parents having been born there. It is also of interest to note that the contractor who contracted to build the new Alberta Club is also a member of the Lethbridge Curling Club.

Many friends of the family in the Pass towns will be interested to learn of the above happy event, and will join in wishing the newly-weds every success and happiness.

THE UNITED CHURCH HARVEST FESTIVAL

Harvest Thanksgiving services will be held on Sunday. Friends are asked to bring vegetables, flowers and fruit to the church on Saturday, for decoration.

The morning service will be conducted by the minister. In the evening the Rev. John Wood of Hillcrest, will conduct a special service. Special attention is given to this service.

Large sections of Alberta rejoice in a good and valuable crop. In view of this we have a direct interest. Let us return thanks on Sunday.

REPORT OF INSTITUTE FOR THE BLIND

Report is attached to the annual report of the Canadian National Institute for the Blind. The splendid work which is carried on by the institute deserves the support of the public. Harris Turner, former newspaperman, who is now director of publications, is director of the printing plant you buy, you will order from The Journal. The work is done by local workmen; not sent to other places to be printed.

IT IS IMPORTANT

That every business house has printed stationery that has a good appearance and is printed from quality paper. There are many substitutes which indicate cheapness. A few cents worth saving on a printing order when so much depends on appearance. If you want a good substitute of the printed matter you buy, you will order from The Journal. The work is done by local workmen; not sent to other places to be printed.

Remington typewriters were widely popular here, and for the past two years assistants to his "binder girls" drug store at Belmont left on Saturday to commence the fall term in Pharmacy at Alberta University.

DISTRICT COURT Sittings HELD ON TUESDAY

Four Cases Heard and Fourteen Applications for Naturalization.

Frank Horeski vs. Louis Dionne, R. F. Barnes for plaintiff, small debt case, settled.

Mike Andreshak vs. E. A. Regner, claim under the Woodmen's Lien Act.

R. F. Barnes for plaintiff, judgment for plaintiff.

Application for guardianship of the infant children of Mary Tarabula, ad-joint.

McBride Johnson, et al. notice of motion, J. W. McDonald, K.C., solicitor for the creditors, and R. F. Barnes solicitor for the debtor.

The following applied for naturalization: Antonio Ferri, Stanislaw Lukasz, Thomas Yakubowicz, Sam Saloff, Joseph Zesula, Philip Karpinchuk, Joseph Yagos, Nick Capuk, Pietro Fergotti, Louis Salvador, Frank DeCecco.

Former Coleman Girl Married in Toronto

Rev. C. E. Silcox officiates at Cou-sin's Wedding at Deer Park.

HIGH NOON CEREMONY
(Toronto Globe and Mail, Sept. 16)

The marriage took place at high noon yesterday, in the chapel of Deer Park United Church, of Adele Agnes Clara, daughter of Mr. and Mrs. O. S. Whittle, Sarnia, recently of Cole-mere, Alberta. John Williams, only son of Mr. and Mrs. John Wocker, Sarnia.

The bride was given in marriage by her father. Immediate relatives were present. Rev. Clark Edward, General Secretary of the Social Service Council of Canada, a cousin of the bride, and Rev. Dr. Gordon S. coke, Secretary of the United Church of Canada, a son of Sarnia, conducted the ceremony.

After a wedding breakfast in the Park Plaza roof sunroom, Mr. Wocker and his bride left by motor for Montreal, Washington and other points of interest. They will be married in a suit trimmed with black Persian lamb. Mr. and Mrs. Wocker will reside in Sarnia.

It is of interest to note that the bride was born in Lethbridge, and aside here went to Coleman public and high schools. Later she went to St. Michael's, Vernon, B.C., and Marquette, Victoria, returning to Alberta via Alberni and finally to Edmonton. Her parents moved to Sarnia in 1935, after 28 years residing in Coleman (Mr. Whiteside having been manager of the hotel there) and he died last year.

Mr. and Mrs. W. A. Vaughn spent the weekend on a motor trip over the Logie Park highway.

Frank Penrose, of West Coleman, was fined \$15 and \$4.50 costs for negligent driving.

Mrs. T. Smith, of Lethbridge, is the guest of Mr. and Mrs. Peter Sharp for two weeks.

Mrs. Geo. Dickson was a recent visitor at Lethbridge and Coalhurst, visiting her brother Andrew at the latter town.

Annie Korolyk, a former pupil of Coleman high school, has been appointed teacher at Hondo, 175 miles northeast of Edmonton.

Fall music classes have commenced. Mr. Moser has resumed violin classes in the Pass towns, and Mr. Franklin in the local Coal Co.

The bridge room belongs to an old and favorably known family in Sarnia. His parents having been born there. It is also of interest to note that the contractor who contracted to build the new Alberta Club is also a member of the Lethbridge Curling Club.

Many friends of the family in the Pass towns will be interested to learn of the above happy event, and will join in wishing the newly-weds every success and happiness.

HOME IMPROVEMENT PLAN FACILITIES

Did you ever look at your house as you approach it and think it looked dispirited and dejected? Remember how a facial or a wave will raise your own spirits and let the house profit accordingly.

You may obtain modernization funds from any Canadian bank under the Home Improvement Plan for the necessary beauty treatment for your home. Credit may be obtained in amounts up to \$2,000 for the plan, improvement, alteration or addition to private homes.

The entrance to a house may often change the entire character of the exterior. A few alterations can be made very easily and inexpensively.

Archie McCulloch, Walter Williams and J. L. Lonsbury were appointed as a committee by the Canadian Legion to arrange for the sale of poppies on Remembrance Day, November 11.

Particulars may be obtained from The Journal office or your local bank.

Another with a good credit rating can obtain a loan from his bank through the Home Improvement Plan to improve his property. The loans are re-payable in small equal instalments.

Free booklet at Journal office.

Paul Minn and Miriam Hopkins in "The Woman I Love" this weekend. This picture was the winner of the Academy Award for the best performance of 1936, and is a story of stolen love that gloriously lifts two great stars to greatness.

Remington typewriters were widely popular here, and for the past two years assistants to his "binder girls" drug store at Belmont left on Saturday to commence the fall term in Pharmacy at Alberta University.

Climbed Crows Nest Mountain on Sunday

Four Youths and "Balto" the Dog Followed the Example of the Boy in "Excelsior."

The shades of night were not falling fast when a party including Owen Jones, Frank Sharp, Henry Evans and Ralph Rippon made the ascent of the famous mountain on Sunday. To have climbed "the Crow" is an achievement in local circles. Many have attempted to climb it, but up though there is a record covering the years of those who have gained the summit. People of all ages have tried it, one of the older people being G. R. Powell, former jeweler here who over ten years ago completed the climb.

Mr. Rippon, Ralph's mother, is also a member of the local mountain climbers' fraternity who climbed the mountain in 1929, when a party of thirteen that started only six climbers.

It is not an easy climb, as those who tried it can tell you. Yet the magnificent view is worth the effort, and it is at least something to brag of to say you have "climbed the Crow."

"Balto" Ralph's dog, was also an appropriate name for the "Hounds of the Barkerilles" stayed with the boys, but spent most of the next day sleeping in the quietest corner he could find. His feet were very sore from padding over the jagged rocks.

Local News

William Bell of the Grand Union is a business visitor in Calgary.

Mrs. C. McQuarrie and two sons have gone to Nova Scotia for a visit with relatives.

Mathew Wilson caught a rainbow trout last Thursday evening, weighing 2 lbs 6 oz.

Mr. and Mrs. W. A. Vaughn spent the weekend on a motor trip over the Logie Park highway.

Frank Penrose, of West Coleman, was fined \$15 and \$4.50 costs for negligent driving.

WEEKLY SPORTS REVIEW

BARRINGHAM TO PROMOTE WRESTLING CARD

Undaunted by previous setbacks in his efforts to put Coleman on the boxing and wrestling map, Frank Barringham is lining up another wrestling card to be staged in Coleman on Saturday, October 2nd.

"I am going to bring in the rough, toughest hozzo that ever stepped into a wrestling ring, with no holds barred," stated Frank. These wrestlers will be from a Pacific coast circuit, where wrestling is a flourishing business.

While Mr. Barringham would not disclose their names, it would be well for those doubling Thomasine to realize that he has tried to get them to the arena, as the hozzo available as yet is not very promising.

It is not an easy task, as those who tried it can tell you. Yet the magnificent view is worth the effort, and it is at least something to brag of to say you have "climbed the Crow."

Loyalty Is Needed

To all who are interested in the development of the Hudson Bay route as a means of transport for commodities in and out of the Canadian west, and that should mean all residents of the prairie provinces, statements appearing in the 1937 report on Hudson Bay marine insurance rates by the Imperial Shipping Committee should convey assurance for the future of the short route between Europe and the middle west of the northern part of this continent.

The report announces reductions in, and advantageous changes in conditions relating to, marine insurance rates on cargoes handled through Churchill, indicates a potential lengthening of the shipping season for the route and, above all, for the first time in the eight years the route has been in operation, the committee voices its confidence in the comparative safety of the route, as expressed in the following excerpt:

"Eight seasons have passed since the new route was opened. The way is well charted and well equipped with aids to navigation. The exceptional circumstances on account of which the warranty is imposed—ice, fog and magnetic disturbance, are known and have been provided against by the gyro compass, direction finding and the very efficient escort of the Canadian patrol vessels.

"It is true that should a casualty occur, some time might elapse before salvage operations could be undertaken, and should the casualty be a very serious one or one which occurred towards the close of the season, salvage might be impracticable. Even though a Canadian government patrol vessel happened to be available for salvage operations, to suspend the normal activities of navigation other vessels might have to wait for results."

"Nevertheless, so far as we are concerned, we are convinced that the Hudson Bay route is no more dangerous, and in some respects less dangerous, than the St. Lawrence route. As against this there still remains the fact that with the present small number of voyages a single total loss in a season is a serious matter for the underwriters."

An excellent feature of the report is the announcement of a reduction in marine insurance rates of 2½ per cent. on cargo carried in vessels using a gyro compass. This is a very desirable proviso, as it is essential that boats making use of the route be equipped with as many as possible approved devices calculated to lessen the risk of navigation through the strait and in the bay.

The "Avon River," the sole casualty of the 1936 season, was driven on a reef without loss of life, was one of two boats using the route last year which did not carry a gyro compass.

It is true, however, that the lack of a gyro compass was not the cause of the disaster to the "Avon River". The committee quotes the London Board of Trade as declaring that the disaster was due "not to any special perils of the route, but to the unusually severe weather conditions which were experienced throughout the world in the latter part of 1936, during which an unusually large number of ships were lost."

The basis on which the reductions have been made and the establishment of the gyro compass as standard equipment for well-found tarp steamers using the Hudson Bay route give some assurance that desert old bulkers are not likely to use the route and thus imperil its growing prestige by founders and imperilling the present rate structure.

Despite the favorable nature of the report, the reduction which has been made in the insurance rates and the encouragement which is being given to the shipping interests to go ahead with the route in Eastern Canada and up north in the West as to its fate in the future have not entirely disappeared. Only recently in the mouthpieces of financial interests in the east have appeared evidences of prejudice in the form of attack against the route, founded principally on a material reduction in traffic through Churchill this year and the fact that this infant route is not yet on a self-sustaining basis.

The tenor of such articles is grossly unfair as they omit to tell the whole story. No reference is made to the fact that the West is suffering from the greatest drought in history, resulting in a lack of grain available for shipment, nor is it pointed out that during the season futures prices have so closely approximated cash grain prices as to make lengthy storage economically unfeasible.

These attacks indicate that the enemies of the route are not sleeping and it behoves the people of the west to demonstrate their loyalty to the Hudson Bay route by giving it their support on every possible occasion and in every possible legitimate manner.

If consumers in the prairie provinces, farmers in the country and business men in the urban centres would make it their business to express preference for goods shipped through Churchill their demands, if sufficiently insistent and persistent, would ultimately bear fruit and result in the increased volume of traffic which is essential if the route is to be speedily built up to sizeable capacity. If more goods are brought in through Churchill more boats will make use of the port for outbound cargo and the greater the speed with which traffic is developed the sooner will rates be further reduced.

Perfect Gasoline Tank**British Invent Tank For Aeroplanes****That Will Avoid Danger Of Fire**

Gasoline fires after airplane crashes may soon be a thing of the past. The Air Ministry has perfected a gasoline tank which is crash, leak and fireproof. Following success of 13 years of experiment, the safety tanks will be placed in both war planes and civilian planes. The first tanks were fired at with incendiary machine-gun bullets. There was no resulting fire. A tank was dropped on concrete where a plane was deliberately crashed at 60 miles an hour. The tank merely bounced, and not a drop of gasoline was spilled.

Greater London's luxury trades including millinery, jewelry and clothing now find employment for 58,000 persons.

Wonderful new invention. Operates from 6-volt battery. Welds—Solders—Brazes \$4.50 Delivered

E. H. ANDERSON, LINDSAY, ONT.

Proper Lighting Needed**Prevention Of Defective Eyesight Due To Poor Illumination**

The fact that more and more people are now using their eyes indoors at severe visual tasks, and neglect of proper lighting conditions are responsible for the prevalence of defective eyes, according to Dr. C. E. Black, clinical lecturer at the College of Optometry of Canada, writing on "Must we wear specs?" in the current issue of "Health," organ of the Health League of Canada.

Glasses alone can never bring relief when eyes are abused by prolonged use under the harsh lighting conditions which exist in most offices and homes, writes Mr. Black.

Most levels of illumination have far reaching effects on almost all bodily functions, he claims. "At present only a beginning has been made in the effects of illumination on the home seeing-machine."

Employers of labour should see to it that factory workers and office workers are given an opportunity of working under better visual conditions, to do their work efficiently. We expect them to do their work efficiently and they should be given the means to do that work efficiently." Elimination of useless waste of energy on their part will result in increased productive work for employers.

Habitual Criminal**Spinal Fluid Is Said To Reveal This**

Two Chicago doctors said that nine years' research led them to believe they could determine whether a criminal was a "confirmed repeater" by examining the "curve type" cells of his spinal fluid extracts. The doctors, S. W. Brownstein, of the Board of Health, and M. H. Levy, of the Cook county jail staff, said microscopic examination of spinal extracts of criminals disclosed a ratio between the men's tendencies to re-enter a life of crime and an abnormal cell count. Nine prisoners who had proved themselves habitual criminals were used in experiments.

ALICE STEVENS' RECIPES**BALANCED MENUS CONTAIN SIX FOODSTUFFS**

We hear a good deal these days about balancing budgets in the home and in the political and business circles. Balanced menus are equally important.

Most housewives fight six of them—"balanced menus" because they do not understand the meaning of the term. A balanced menu is one that keeps the body in health and provides the necessary food for growth.

A diet must contain six foodstuffs to meet these requirements. Fats and carbohydrates are required to supply the body with energy. Starches and sugars are included as carbohydrates.

The body requires food for new growth, for repairing old damaged tissues. This is supplied by protein foods in the diet. Some of the more common protein foods are eggs, milk, beans, fish, meat and cheese.

Mineral matter, water and vitamins are needed to regulate our bodies and to keep them healthy. Potatoes and onions are said to correspond to the spark of the engine. These three food stuffs are found in a number of foods but are particularly rich in milk, eggs, fruits and vegetables.

All of these foodstuffs are found in the following menu: Liver Casserole, baked potatoes, creamed carrots, bread and butter, apple crumb pudding.

LIVER CASSEROLE

2 onions
2 apples
½ pound cat liver
Medium potatoes
Salt and pepper
1 teaspoon sage

Cut onions up fine. Put liver in a casserole and put it after a few minutes. Put a layer of liver in the casserole. Add one layer of each onions, potatoes, and apples. Add salt, pepper and sage. Repeat with onions, potatoes and apples. Have a layer of potatoes on top. Add one cup stock or boiling water. Bake 1 to 1½ hours.

APPLE CRUMB PUDDING

8 to 10 apples
¾ cup sugar
Cinnamon
¼ cup butter
¾ cup brown sugar

Cut the apples and cut into thin slices. Pile in a buttered baking dish and continue until the dish is filled. Sprinkle with sugar, cinnamon, white or brown and cinnamon.

Prepare the crumbs for the top by creaming together the butter, brown sugar, and flour. When this mixture is packed together, it resembles fine bread crumbs pat it on top of the apples. Bake about 20 minutes or until the apples are soft and the top is a golden brown.

Island That Grows**Fantastic Growth Of Island In The Danube River**

The case of an island that grows is now concerning the Hungarian legal world.

About 50 years ago the village of Danube held a little island of three acres in the church community of Dunavas for a small sum.

Instead of diminishing in size, like other islands in the Danube, the little island grew steadily bigger, and has now attained to about 19 acres.

The fantastic growth of the island has annoyed its former owners, who now claim payment for the acres which have, literally, materialized since its sale.

The church community, on the other hand, refuse to make further payment on the grounds that they bought and paid for the whole island.—London Observer.

Will Have Quiet Winter**Young Princesses Not To Be Seen Much In Public**

It is no secret that the Queen has been much exercised about the effect on her little daughters of their many public appearances this summer. August at Balmoral was maintained in family privacy, and it is likely that the little girls will make few appearances in the autumn, says the London Daily Telegraph. In the Christmas holidays, a pantomime, the circus and a fairy play, with one or two children's parties, will naturally be avoided. The Queen's Daughters lessons with the help of the Palace swimming lessons at the Bath Club. Both Princesses will work especially hard at their languages this winter. The Duchess of Kent takes great interest in this branch of their studies and talks French and German with her elder niece.

**ARTICLE NO. 11****Prevention Of Cancer No. 3****Medical Education**

The Hon. Dr. John M. Robb, former Minister of Health for Ontario did a fine job for the medical profession and public by his enterprise in setting up the first Royal Commission on Cancer instituted in any country, and by the subsequent establishment of the existing cancer clinics in that province.

The work of the oldest material in hospital is that of all kinds all over Canada has never been utilized to its full extent.

The average doctor, though he is ambitious enough to secure post-graduate education at his own expense, has heretofore learned little about cancer since he left college. The distribution of the King's Fund, although the amount available is ridiculously small, will afford an opportunity for the Canadian Medical Association to offer access to clinical instruction in hospitals and special cancer institutes.

The Cancer Committee, originally instituted by the Health League, is engaged in the preparation of a booklet for doctors on cancer. In this booklet, the work of men eminent in the various phases of cancer diagnosis, treatment and the latest developments on the subject will be discussed. In respect to this devastating malady, a new sense of responsibility has arisen in the ranks of the medical profession. The result of this is hopefully to be seen in the fight against cancer.

In the conquest of cancer, a huge sum of money is needed, money for medical education, for the education of the public, for investigation and research and for the uncovering of the frauds of quack cures. There are enormous hoards of wealth in Canada. Will not our wealthy friends, none of whose families are immune to cancer, loosen their purse-strings and join in the battle against one of the cruellest diseases which affects mankind?

THE FLAVOR LASTS**Great Bear Lake Mine****Important Pitchblende Find Located At Considerable Depth**

What is characterized by President A. LaBine, of Eldorado Gold Mines Limited, as "the most important pitchblende discovery underground since the commencement of operations on the property" is reported from the Great Bear Lake Mine of the silver-rare earth producer by Mineralogist E. J. Williams.

"Crosscutting from the No. 2 vein at the 500 horizon with the objective of reaching No. 1, the discoverer has hitherto been completely unknown below the surface, which appears to be the downward projection of No. 1 vein to that depth has been reached," Mr. LaBine states. "Drifting has now continued for 70 feet and has yielded the most important pitchblende orebody found to date" on the property. At last reports, the face was still in.

When Gilbert LaBine made his original discovery on what is to-day LaBine Point and the site of one of the greatest potential radium producers in history, what he found were the surface outcroppings of No. 7 vein. In earlier work with hand steel, a surface pit was opened for a distance of 20 feet and about 10 tons of ore was broken out of the vein. The surface samples were scientific rarities, much sought by museums throughout the world. Geologists who visited the property in the sub-Arctic at various times came to offer the opinion that No. 7 vein was the principal vein. But development work was first begun on No. 2 vein which showed consistently rich pitchblende and silver as well as copper. This development and the actual operations continued on No. 2 vein to a depth of 500 feet.

Quite Unusual

A Vermont village pastor, who had a weakness for trout, prepared against fishing on Sunday. The next day one of his parishioners presented him with a fine string of fish and said, hesitatingly: "I guess I ought to tell you, parson, that those trout were caught on Sunday."

The minister gazed appreciatively at the speckled beauties, and said, "The trout aren't to blame for that."

To tell summer temperatures correctly, a popular science note informs us, all you have to do is count the number of times a tree cricket chirps in a second, and add 40. Another way is to look at the thermometer.

Asia's non-Christian Confucianist Taoist sect had 850,600,000 members, the largest religious following in the world.

How The Language Grows**The Word Telegraph Was First Used In 1792**

The word "televisor" was coined by J. L. Baird in 1925 to describe apparatus for television and was registered by him as a trade mark. On account, however, of the general adoption of the word in the United States and elsewhere to denote any kind of television apparatus, Baird Television Ltd. has decided to abandon its registration as a trade mark, so that in future there will be no restriction upon the use of the word in connection with television. "Televisor" may thus be used in future as freely as "telegraph" and "telephone".

The word telegraph was first applied by Chappe in France, in 1792, to his invention of the semaphore system of transmitting messages to a distance; and the word telephone was used by Sudre in 1823 for a system of signifying by musical sounds. It was employed in 1844 to describe a powerful wind instrument to convey signals at sea during foggy weather.

Philippe Reis, in 1861, called his ingenious instrument telephone, so that he may be regarded as the inventor of the name of the modern instrument. Alexander Graham Bell adopted the word in 1876 for his "Electrical Speaking Telephone." Nature.

Sees End Of Drought**Professor Predicts Bountiful Harvests For Next Year**

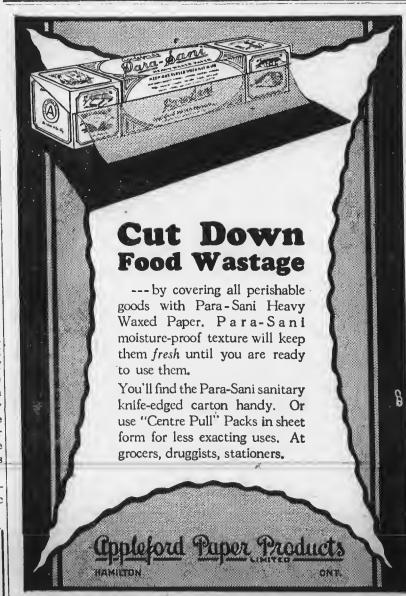

Cycle of dry years which has ruined grain lands on the southern Canadian prairies has ended and bountiful crops may be harvested next year, it was forecast by Dr. Frederick James Alway, famous Ontario agronomist at Ed蒙特利尔, an interval.

Dry years occur in definitely traceable cycles, he said, and "the cycle which this year has caused such dreadful ravages throughout the grain belts of Canada and the United States is ending now, probably is already finished.

"I am prepared to state without hesitation that it is likely to be one of the wettest, most productive crop years in decades, and it is a pleasure to be able to make such a forecast with sincerity after witnessing what I have seen in Saskatchewan this summer," asserted Dr. Alway, professor of soil chemistry and chief of the division of soils at the University of Minnesota since 1913.

Dentist: "There's no need to make all that fuss, sir. Why, I haven't touched your tooth yet."

Patient: "No, but you're standing on my corn."

You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

Warehouses at Calgary, Regina and Winnipeg

Through Economic Co-Operation Leaders Strive For Peace

Ottawa.—Prime Minister Mackenzie King Sunday night stated that "in this stormy and transitional period of human affairs fear has largely supplanted faith in the conduct of nations and their ultimate civilization is at stake."

It was plain, therefore, he said, that "governments and individuals alike must . . . pursue the arts of co-operation and conciliation in every possible field of affairs."

The Canadian prime minister joined with leaders of many nations in an international symposium on world economic co-operation sponsored by the Nations' Peace conference. They pledged themselves to strive for peace through economic co-operation.

Mackenzie King spoke on a broadcast with Cordell Hull, United States secretary of state; André Gide, British foreign secretary, who spoke from Geneva; Prime Minister Georges Chautemps of France; Premier Van Zeeeland of Belgium; Chancellor Von Schuschnigg of Austria; President Alfonso Lopez of Colombia and Premier Mylan Hodza of Czechoslovakia.

Outstanding in the broadcast was Eden's expressed hope that Great Britain and the United States might soon sign a trade agreement.

"Canada has already made a trade agreement with her great neighbor, and I very much hope that it may be found possible for the United Kingdom also before very long to reach an agreement with the United States for the reduction of customs duties on a most favored nation basis," he said. "Such an agreement would surely redound not only to our own advantage but to that of the whole world."

Mackenzie King said that with "conditions of war" actually existing on two continents, some might think the present an inopportune moment to begin a campaign for world economic co-operation.

"It may well be that for all countries it would have been better had something of the kind been commenced years ago," he added. "The fact, however, that this is so only serves to make clear the wisdom of the undertaking itself."

Speaking the paths of international economic co-operation, he added: "There surely lies an effective means of avoiding further wide-spread if not world-wide, civil and international strife. In economic co-operation there also exists a means of bringing into being a world order."

which holds within itself some promise of an enduring peace."

The prime minister spoke of the British Commonwealth of Nations, in which "force and compulsion play no part." Canada was happy to cooperate to restore the normal flow and volume of international commerce. In this connection Canada had concluded a number of reciprocal agreements which, through the reduction of trade, "have had the effect of increasing trade and of enhancing good relations."

"It is now possible," he said, "for Canada to claim that she employs no quotas, no exchange restrictions and no embargoes except of course those that may be connected with the traffic in arms and the prevention of the spread of disease."

Hull, speaking from New York, said it is "difficult" to talk of peace when bombs are exploding and desperate armies are marching."

He declared, however, through enlarged international trade there can come "an equilibrium of peaceful interest more stable than the equilibrium of matched canon."

Chautemps declared some nations suffer through shortage of raw materials and are not in a position to export.

"This is no wonder, as such countries seek to expand, that we see them organizing an aggression; we usually call an invasion," he said.

"Under the chaotic conditions of the present time, wherein imperialism threatens to spread beyond national borders and where propaganda in favor of new ideologies jeopardizes the territorial integrity of states, nothing short of a universal combination of nations would be bound to insure the unqualified and lasting blessing of peace."

Heavy Apple Loss

Storms in Annapolis Fruit Valley Cause Great Damage

Halifax.—An apple valley grower confirmed estimates of 600,000 barrels, valued at approximately \$1,500,000, as their loss in two gales, which swept through the Nova Scotia fruit belt just recently.

All three of the major fruit-growing counties, Annapolis, Kings and Hants, placed losses at about 40 per cent of total production on the trees. Approximately 180,000 barrels had been shipped overseas, and an equal amount placed in warehouses during the storm struck.

Extend Policy For Facilitating Movement Of Feeder Cattle

Ottawa.—Policies by which the Dominion government has been promoting the movement of feeder cattle from the drouth areas in the prairie provinces to other parts of Canada have been extended in new regulations made public by Hon. James Gardiner, minister of agriculture. They will be in effect until the end of the year.

The feeder freight policy, under which the government refunds half the freight charges on cattle shipments, will apply to a greater number of municipalities than before and may be used for sheep as well as cattle.

The feeder purchase policy, which gives authority to pay one-way travelling expenses to intending buyers, has been extended so that eastern farmers may take advantage of it to journey to any point in the three prairie provinces. Formerly it was applicable only to trips into the drouth areas.

Under the new regulations the feeder freight policy applies on feeder cattle of specified ages, on breeding ewes five years of age and under and on feeder lambs purchased and shipped direct from a country point in the prescribed drouth area in the three prairie provinces to a country point in the Dominion outside the area.

The policy will also apply on cattle purchased at the 100,000-acre grazing reserve set up by the Dominion at Carberry, Man., by purchasers resident in Manitoba or eastern Canada.

The cattle of the reserve are those purchased by the department from the drouth area and assembled at the reserve where they will be offered for sale on Friday each week until all have been disposed of.

Japanese Offensive

Driving Chinese Army Back On Broad Front

Peiping.—Japanese headquarters announced the greatest offensive undertaken by the Japanese army since the Russo-Japanese war 32 years ago was driving the Chinese back on a broad front south and southwest of Peiping.

It was said to be outflanking the Chinese and weakening the stubborn resistance which stopped all Japanese efforts to advance down the Peiping-Hankow railway since early in the north China conflict, now nine weeks old.

The Japanese hoped to drive back the right flank of the Chinese defense line in Central Hope province and open the way into southern Hope, perhaps even into Shansi and Shantung provinces.

Twenty thousand Japanese cavalry formed the spearhead of the drive below Peiping, in which some 60,000 Japanese were said to have routed eight Chinese divisions, about 100,000 men, along a 70-mile front.

This operation was independent of, but co-ordinated with, Japan's drive down the Tientsin-Pukow railway, which reached a point 10 miles north of the Chinese base at Tsang-tsou, 60 miles south of Tientsin.

Japan's new north China commander-in-chief, General Count Vichi Terauchi, former minister of war, took the huge operations. His command was estimated at 125,000 officers and men.

The driving force, Peiping, Japanese said, resulted in the capture of Kuanhsien, below the Yungting river, some 30 miles south of Peiping.

NOTES AND COMMENTS

THE ABUSE of the premier is calculated only to stir up mob emotion. It is not solving problems or making good the promises on which he sought election. A red herring undoubtedly is being drawn across the trail. He asks for someone to devise something better. In answer it might well be asked—what has he done? Surely the system he so roundly condemns is better than none at all, and so far he hasn't produced any to mitigate the evils of which he so loudly proclaims.

People in a general rule do not trouble about thinking. They listen to Aberhart and let it go at that.

VISIBLE AND AUDIBLE protest is required by those opposed to Aberhartism to show up some of the false statements on which he bases his appeal. The true pledges which are so freely attributed may be signed by many who have no right to make them. Do not carry conviction for many signed the covenant simply because they thought they might as well be on the receiving end if anything was to be given away for which they hadn't to pay anything.

AN OPEN letter addressed to Mr. Aberhart by Lawrence Anderson, secretary of the Communist Party of Canada, contains among other things the calling of an election and the cancellation of the R.C.M.P. agreement as soon as possible.

So have an unholy alliance between Premier Aberhart and the Communist party to work against constitutional government. How well the workers of the Crows' Nest Pass know the machinations of the Communist party, whose favorite tactics are to get appointments to trade union or other organizations and then bore from within to wreck and take over control. This is the objective in their friendliness towards Premier Aberhart, whose irresponsible propaganda is aimed to develop unjustified hatred of class against class.

THE PROTEST meetings being held by the forces opposed to Aberhartism are very necessary in order to show to the rest of Canada that there is a very large section of public opinion in Alberta desirous of making visible and audible protest against the wrecking tactics of Aberhart's party.

A LADY in indignant tones hailed us as we came to the office one morning this week. The cause was quickly explained. Cattle had torn up the

ANNOUNCEMENT

Mr. and Mrs. H. Fairhurst, of Coleman, announce the marriage of their elder daughter, Hilda, to Craig Furlong, of Vauxhall. The ceremony took place at the Manse, West Calgary, on July 27, Rev. A. R. Aldridge officiating.

ENOCH WANTS A NEW DEAL

A mimeographed sheet issued by Enoch Williams calls for a new deal, with six points of progress put forward by the Communist party, "in order to stimulate the growing movement of labor-farm unity." Old age pensions at 55 is one of the planks; \$1.15 a bushel for wheat as the minimum price at Fort William is also proposed.

Here's a boost for Nova Scotians taken from Blackwood's Magazine, Cranbrook Courier.

London: Canada's Nova Scotians are a thrifty lot—there's not enough of the spendthrift English and Irish in the racial stock to offset the Asatian, Norman French, and Highland Scotch—and their only extravagance is education. You couldn't throw snowballs in one of their settlements without hitting a fine gentleman. They supply Canada with prime ministers and bank managers and the U.S.A. with college faculties and the rest stay home and keep the province going.—Cranbrook Courier.

Fashion
Flashes

...By JANE DEE

HEARD the Fall Fashion news? If you haven't it's time you did—for how can you plan a smart Fall wardrobe without knowing "what's what" in the fashion world?

Did you know that there are three new silhouettes for Fall with Paris having each one? That's right! There are great heights! What shoes are sleek as paint? That color plays a very important part in the Fall fashion picture?

Why not take advantage of the Stylist Service by writing to me? I will be delighted to tell you all about the new trends for Fall—the latest fabrics, trimmings and styles being featured in New York and Paris.

It's an easy way to keep up-to-date and will save you time and effort in planning your clothes for Fall and Winter.

The Facts About Banking in Canada

Reproduced from the Third Broadcast in a Series by Vernon Knowles for the Chartered Banks of Canada and Delivered Over a Province-Wide Network of Alberta Stations on Tuesday Evening, September 21st, from 8:30 to 8:45, and Wednesday, September 22nd, from 12:00 noon to 12:15.

Millions Paid in Taxes to the Dominion Government... More Millions to the Provinces and to the Municipalities... Alberta's Revenue From the Banks Boosted... Most Branches Operate at Loss... Banks Have Faith in Alberta.

CANADA'S Chartered Banks have paid in taxes, in Canada, during the last ten years \$74,801,000.

We promised last week that we would tell you about the load of taxation we carry. Before we get along very far to-night we shall give you a very plain, short set of figures. I would like you to get a pencil and paper to take down these figures when I reveal them to you.

We shall tell you also about our earnings, our profits and dividends. Our critics have been talking a great deal about the fabulous profits we are said to make; that criticism is unfounded. Let me repeat, as I said in our first broadcast, that we believe that many critics of the banks are sincere. We too are sincere.

You are often told that the banks should be taxed but we tell you that the banks are taxed, and we want to tell you some things that will interest you about the taxes we bear.

Now are you ready with that pencil and paper? We will pause for a few seconds so that you may get ready.

We are not going to ask you to take down a long list but just a few plain figures—

Well now, are you ready?

Here's the story: During the last ten years the banks have paid:

In taxes to—

The Dominion \$22,771,000
The Provinces 13,268,000
Municipalities 38,262,000

This makes the sum I gave you in starting this broadcast—a total of \$74,301,000, which we have paid in taxes in ten years. The banks do not complain of fair taxation; they expect to bear their due proportion of the expense of running a Municipality, a Province or the Dominion but, because so many people have been led to believe that the banks are not taxed at all, we are telling you of the taxes that we do pay.

Taxes to the Province of Alberta alone. This year the Province imposed upon us a new and additional tax of one-tenth of one per cent of our paid-up capital. It amounts to \$141,000 this year. Last year we paid to the Alberta Government total taxes of \$81,150. This averaged out at \$390 per branch. From paying \$81,150, in 1936, our Alberta tax in 1937 has been boosted to a grand total of about \$222,000, or nearly three times what it was before.

We have told you the story of Provincial taxes. Now we turn for a moment to Municipal taxes. In 1936 the total of taxes we paid to Alberta Municipalities amounted to \$253,600. Our total of Municipal taxes in Alberta average out at \$1,219 per branch.

Let me repeat—the taxes paid by the banks in 1936 to the Province of Alberta alone averaged out at \$390 per branch. In 1937 they had risen to an average of \$1,115 per branch. And let me further repeat that the Alberta municipal taxes paid by the banks last year amounted to \$1,219 per branch. At this rate we are now paying a total of \$2,334 per branch in Provincial and Municipal taxes combined, quite regardless of the heavy Dominion taxes we bear. The Provincial and Municipal taxes combined, which are paid by the banks in Alberta, now reach the grand total of \$475,600 per year.

And yet, to hear some folks speak, you'd never know that the banks are taxed at all!

Do you know that very few of the bank branches in Alberta are making any profit? We are now going to tell you something that has never been revealed to the public before—we are letting you in on a secret.

Now if you are ready again with your pencil and paper we will give you the actual figures for 1935, the most recent year for which complete figures are available. There were then 221 branch banks in Alberta:

Only 41 of them made any profit.

Seven of the 41 made not more than \$300 in that year.

And 180 were operated at a loss.

You can figure out for yourselves what effect \$141,000 in new and added taxes has had on that picture.

With all this newly-revealed information I give you the truth. The picture is still incomplete, for you all know that a business such as ours cannot be carried on without some losses. Indeed the net result in Alberta for the ten years 1926 to 1935, is that after providing operating expenses and taking care of bad and doubtful debts, the banks have incurred a very substantial loss.

The money thus lost, I assure you, did not drip from the end of a fountain pen.

You may ask—"Then why do the banks continue to operate in Alberta?" We answer: "Canada's Chartered Banks have faith in Alberta's future and in the people of this Province." We feel sure that the period of hardship and drought will pass. The West has had a terrible struggle during the last seven or eight years. I remember the time, and many listeners must remember it too, when this Western country produced an export wheat crop of three to five hundred million bushels a year, when prices were high and marketing conditions were good. For years the West had, roughly speaking, from Three to Five Hundred Million Dollars in new money coming back into this country from the marketing of this newly-produced wealth. Then, through fear of war and other conditions, the countries in Europe started restricting their wheat imports and growing their own. World markets collapsed. Canada's banks did not do it; fear in Europe had much to do with it. And after that came the succession of heart-breaking dry seasons that our farmers have endured. You and I know what that has meant to Alberta. It has meant that for about seven years in the Great Central Plain of this Province and for almost ten years in the South, farmers have had either no crops or poor markets, which in any case result in the same thing—little or no money.

Canada's Chartered Banks do no more to do with the collapse of the markets in Europe than they had with bringing on the drought.

The real basis of hardship in this Province, as in the other Western Provinces, is that this great annual crop of new money has not been coming in.

If Canada's banks, by any miracle of lending, could have made it come in you can be sure we would have done so; for it is by lending that we live. That is our business. The banks are a part of your community. While you suffer we cannot prosper.

I have shown you how few branch banks in Alberta make any profit and how many are losing and, on top

of these losses, as I have shown you, we have an increased tax burden to carry.

Alberta audiences are intelligent—they are alive to questions of economics. Remember our responsibility to safeguard the funds of depositors. When we are losing money, if costs are increased by steep advance in taxes, what then? The alternative is either to pass on to our customers these added costs or steadily close out losing branches to a point where ends can be made to meet. Either way is a hardship to our customers and an inconvenience to their communities.

Now we turn to the matter of earnings. There is a popular misapprehension that because we pay one and one-half per cent on savings deposits and because, on the other hand, the highest interest rate we can charge by law is seven per cent, the difference between the one and one-half per cent and the seven per cent is all "velvet"—all profit. Let me point out to you why it is not so.

We have costs:

I am sure that all of my hearers are aware that no business can be carried on without costs. We pay wages. In the Province of Alberta alone during the past year we paid \$2,015,000 in wages to employees. We pay rent on premises. We spend money for stationery, printing and postage. We buy water, fuel and light. We pay the enormous taxes that I have spoken to you about. We contribute heavily to pension funds and to group insurance for employees. Depreciation on bank buildings takes a large sum each year. We have also to set aside a substantial amount each year as a reserve for bad debts.

In addition to our costs there are distinct additions on bank earnings. Only a relatively small proportion of our loans earns the legal maximum of seven per cent. Let me tell you about these restricted earnings.

Banks must keep themselves in such a position that anybody going to the bank to withdraw his savings can get his money. We are required by statute to deposit with the Bank of Canada, earning nothing at all, a certain percentage of our depositors' funds. In addition it is necessary to keep in short-term investments a further amount upon which the yield is low. Why is this yield low? Because the bonds in which these funds are placed will mature at short date. Cash reserves of other companies as well as those of Chartered Banks are looking for this sort of investment—the type which can, of course, most readily be turned back into cash. The demand for this type of investment is great and the supply none too plentiful; therefore, the price is high—which is another way of saying that the earning—the yield—is low.

The costs of doing business, coupled with restrictions in earnings, eat up most of the difference between the one and one-half per cent we pay and the seven per cent which it is wrongly supposed we earn on all our loans.

Let us take a little instance of the earnings on a loan. Let us say a farmer borrows \$100 in April, expecting to repay in the fall—say a six months' transaction. If the interest is seven per cent the gross amount of rent on this money paid to

the bank is \$3.50—in other words the farmer has used \$100 for six months at a rental of \$3.50; but what does the bank receive net? Not \$3.50, but a matter of cents only. We have taken a six months' transaction for illustration. The rate of profit is no greater if the loan runs longer. Why? Because the costs we mention are running on all the time, too.

Last year's net earnings of the Chartered Banks on all of their business everywhere amounted to only one-half of one per cent on total assets and in previous years approximately the same. What commercial business or enterprise gets along on so narrow a margin?

You often hear it said that we pay big dividends and our own published annual statements are often used against us as seeming proof. Do you know that for every dollar of dividends paid the banks pay ninety cents in taxes?

The fact is that while by law \$100 is the par value of bank stock the average price at which the banks have sold their shares is \$163, of which \$100 has gone to Capital Account and \$63 to Reserve. In addition, during the scores of years the Chartered Banks have been in business, earnings of \$29 per share—instead of being paid out in dividends to shareholders—have been transferred to Reserve to add to the protection of bank depositors.

The total of a shareholder's investment is, therefore, on the average \$192 per share. So an \$8 dividend per share is a payment of only just over four per cent on the money invested.

Now we have dealt with taxes, earnings, costs and dividends. We have shown that banks operate upon a much smaller margin of profit than other lines of business.

We want to bring it home that the branch bank is a part of the community—that is true in the strongest sense. Besides giving a valuable service, banks maintain offices and staffs in scores of Alberta communities. They give opportunity of employment and a start in life to young people who take an active part in community affairs.

As a customer of public utilities, your local bank buys water, light, gas, power and fuel. It pays local taxes which go to the support of schools and hospitals and other public institutions. It is on the job the year around, sharing your problems and taking its place as a good citizen.

And let me say that apart from their share of Dominion Government revenue from any revenue for bad accounts, the Alberta Branches of Canada's Chartered Banks spent last year in taxes—Provincial and Municipal—in such things as wages, goods and other services, the huge sum of \$3,000,139 to carry on business in Alberta. That was purchasing power for Alberta—and that money was not created out of nothing.

I hope I have made it clear that we have carried on these services throughout the long, lean years, at a loss so far as our operations in the Province of Alberta are concerned. Canada's Chartered Banks have faith in the future of Alberta and confidence in the fair judgment of its people when all of the facts are before them.

HEAVY TAXES CURTAILED REVENUE FROM TOURIST TRAFFIC

Those states which would add restrictive tax and highway-barrier laws to their legislative enactments, should "Stop, Look and Listen." They might profit from the experience of New Mexico which enacted a caravans law under which the state collected a toll for the use of its roads for carriers and caravanners. The law was upheld by the United States Supreme Court and was held up as a model for this type of legislation.

Officers of the southwestern state woke one gloomy morning a few weeks ago and found out that although their receipts from their caravan law amounted to \$228,000 for the year ending June 30, 1937, their tourist business had gone to pot. In addition it cost \$88,000 to operate their port of entry system for their new law.

While tourist business was increasing by leaps and bounds in neighbor-

ing states, in New Mexico it was down almost one third for the first quarter of 1937 as compared with the same period last year.

Business men all over the state soon realized the error of their ways and the legislature stood to \$20,000,000 which is one third of its tourist revenue, in order to collect \$250,000 in road tax. This was convincing enough argument to discontinue the tax.

Salvation Army Leaders to Visit Coleman

Major and Mrs. J. Acton, popular S.A. leaders in Alberta, will visit Coleman on Thursday, Sept. 30.

At 8 p.m. that evening the Major will conduct a great evangelistic service. All friends of the Salvation Army are invited to attend.

Typewriting has taken a strong hold among teachers and pupils. Classes are held from early morning till late after-

noon and the clack-clack of typewriters is heard continuously. Miss B. L. Dunlop, B. A., is supervising the classes, and the board has purchased a number of machines for the use of the classes. Several pupils have purchased machines.

Former Coleman high school students who left for the opening of Alberta University are Alwyn Hayson and W. Borrows, who are taking the course in Pharmacy; Alan Short, chemical engineering.

WORLD HAPPENINGS BRIEFLY TOLD

Scotland Yard announced the ban on political marches in the East End of London has been extended three months.

Benches in Berlin parks reserved for the use of Jews will be painted yellow, authorities in the western section of the city, where most of the Jews live, announced.

A new type of undersea mine capable of protecting ports effectively in time of war has been perfected by the admiralty, the London Sunday Referee said.

Egypt's new ruler, King Farouk, will be crowned Feb. 11, 1938—his 18th birthday under the ecclesiastical calendar. The young king was invested as ruler on July 29—his 18th birthday under the Moslem calendar.

While Halifax police delved into bigger crimes, somebody walked up to the station and lifted from its hinges a 300-pound gate connecting city hall and the police garage, and made good his escape.

One hundred and five bushels of oats to the acre is the record harvest of N. P. Tracy, a Letchbridge district grower. He threshed a 14-acre field of oats. The total yield was 1,470 bushels.

Traffic fatalities among Detroit children have been at 78 per cent. in recent years by the school safety patrols. 6,500 boys who protect 2,500 city crossings for an aggregate of 12,000 hours each day.

It is not often that a storm interferes with soccer, but a recent English league fixture between Walsall and Mansfield Town was abandoned when heavy clouds made visibility almost nil.

The Aga Khan, famous sportman and delegate from India, was elected unanimously as president of the League of Nations assembly. The prince is head of a sect of Moslems in India.

More Population

Says Canada Needs More People To Fulfill Destiny

Two prominent Canadians—one a senator and the other director of colonization and agriculture for Canadian National Railways—told the Canadian Chamber of Commerce convention at Vancouver that Canada's principal need was more population.

Senator J. W. deB. Farris of Vancouver, said "our machinery, our men and our engines are big for the steamer we are able to generate." He said Canadian Railways had the foundations and erected a superstructure for three or more times the present population.

The same thought was expressed by Dr. W. J. Black of Montreal, who called for "constructive leadership" of the immigration problem because Canada needed more people "if we are to fulfill in any degree the destiny that nature intended for us."

"We have in abundance great public institutions . . . for a population three times the size we have," he said. "Our railroads have been extended in all directions at the request of the people, and are obliged to serve territory in places which require them limited revenue because insufficient people are there."

Dr. Black suggested Great Britain, the United States, Scandinavia, Switzerland, Czechoslovakia, Belgium, Holland and the Ukraine could provide Canada with the type of "good farming families" she needed.

A Family Of Friends

It is pointed out in the obituary notices of the late Sir Daniel MacLean, of Melbourne, that he was not only a Professor himself (Chemistry), but that he was the son of a Professor and a Professor's daughter, the father of a Professor, the father-in-law of two Professors, the brother-in-law of a Professor, and the cousin of a Professor. On the occasions of family parties there always chairs enough to go round?—London Observer.

Peculiar Accident

Static electricity generated on a dog's back was blamed for 8-year-old Teddy Fogel's badly burned right hand. John Questa, assistant fire chief, in Reno, Nevada, said the boy was petting the dog which was tied to the back of an automobile. The cap on the car's gasoline tank had been removed. There was a flash of flame and an explosion.

War Will Affect Prices

Highest prices if the Chinese war lasts can be expected for the following articles: silk, tungsten, tea, hides and skins, bracelets, hairbrushes, carpet wool, cotton oil, tallow, tin, salmons, China products, two-thirds of the world's tungsten used in making tool steel and electric light bulbs.

Cannot Do The Impossible

Britain Unable To Protect Both The Mediterranean And Shanghai

At the map of China reveals that Shanghai is a sort of natural phenomenon. It was bound to grow up the moment the outside world began trading with the interior of China. The mighty Yangtze is the chief artery of such trade, and Shanghai is planted squarely at the water's edge to control such trade. It is a kind of "free port" where foreign goods can be warehoused and Chinese products brought down to exchange for these imported wares. There will always be a Shanghai. But if the Japanese can convince Europe and America that their tenure at this point is much too insecure for profitable investment in permanent establishments, it might come to be a Japanese Shanghai. This would give Japan a far firmer grip on China than would even a Japanese Peiping.

But the cooling thought should always be kept in mind that the British Empire cannot do the impossible. Britain may not like to lose Shanghai. She may not like to see the fate already of China's trade situated away from her. She may be uneasy at the loss of prestige in Asia which this whole business is bound to cause.

But she has other more pressing responsibilities nearer home. It would be insane for her to waste her strength and fritter away her incomplete new armaments in a conflict in Asia while the Mediterranean lies under a constant and growing menace and the peace of Europe may soon be shattered when the time is ripe. She can wait at Singapore for any new developments in the China Sea, and she can protect India by keeping the lifeline open from Gibraltar to Aden. The British Knights of the Table Round, questing all over the world for wrongs to fight, have gone out of business long ago.—Montreal Star.

Prefer Northern Rule

Trans-Atlantic Air Promoters Believe It Is The Best

Canada's trans-Atlantic air promoters are pushing closer to the Ireland-Newfoundland route and they have little confidence either in the South Atlantic or the North Pole route favored by the Russians, and which has apparently resulted in another tragedy.

Because of this firm faith in the North Atlantic route, which is evidently shared by the British interests, and which has won co-operation from the United States, it is believed that experimental flights by Imperial Airways across the North Atlantic which have been conducted during the summer will be continued in the coming winter.

There will be transfer to the South Atlantic route via the Azores and Bermuda, as had been expected. There is no clear indication to what extent Pan American Airways will co-operate in this route, but Canadian experts are persuaded that the Ireland-Newfoundland route is commercially practicable even in winter. They assert the southern route is too slow, its longest hop consuming as much time as the entire trans-Atlantic crossing by the northern route.

Health Insurance

Governments Should Go Ahead With Plan Only On Advice Of Medical Profession

Governments should go ahead with state-sponsored health insurance only after they have taken the advice of the medical profession as a body. Dr. T. H. Leggett of Ottawa, president of the Canadian Medical Association, said.

Speaking before the 45th annual convention of the British Columbia Medical Association, the Ottawa physician said the scientific side of medicine and surgery "has made remarkable strides in the last few years; that it has left behind the economic side."

"Medical men are unable to distribute benefits of medicine, surgery to the poorer man," he declared. This, he said, had given rise to talk of government-sponsored health insurance but such a step should be taken only after the governments have taken the advice of the medical profession.

The day must come, Dr. Leggett declared, when federation of doctors throughout Canada will become a reality. It is needed, he said, to give united advice to any government on the question of health insurance.

Beavers do not eat fish although they spend most of their lives in water. They are strictly vegetarians

X-ray motion pictures are being made in Berlin.

TOTS ADORE A BRIGHT JUMPER FROCK FOR SCHOOL OR PLAY

By Anne Adams

Come Autumn with its crisp days, and every clothes-loving tot will crave such a fetching jumper frock as Pattern 4493 to flounce her through school and everyday wear. Stitched in a soft, plaid fabric, with a contrasting tweed, or challis, the jumper looks ever so smart, worn with several dainty blouse versions in contrasting colors. The pattern includes a chart for the various sizes, and a full page of instructions.

Send twenty cents (20c) in coin (preferably) for this pattern. Address: Anne Adams Pattern Dept., Winnipeg Newsprint Company, 175 McDermott Ave., E., Winnipeg.

There are more than 6,000 kinds of flowers in Hawaii—all developed from three original varieties.

The Family Doctor

Old-Time Family Physician Has Not Disappeared, Says Speaker

Prevalent belief the "old-time family doctor" has disappeared from modern practice is "rather amusing," Dr. J. S. McEachern of Calgary said in an address at the closing session of an annual convention of the Alberta branch, Canadian Medical Association.

Individuals who express such beliefs are showing "abysmal ignorance," and probably are thinking of a bewhiskered individual who makes his calls from house to house in a two-wheeled gig, Dr. McEachern stated.

The speaker, chairman of the provincial cancer committee, emphasized importance of co-operation from the "family doctor" in stamping out the dread disease.

Work of education which the cancer committee was attempting to further could be helped immensely by co-operation of staffs in hospitals if they would appreciate the need to study history, and by the efforts of the "family doctor" in allaying fears of patients and explaining cancer symptoms in the community, Dr. McEachern said.

Air Conditioning

Has Now Developed Rapidly Along Industrial Lines

Air conditioning, although first approached from the standpoint of achieving personal comfort, has developed rapidly along industrial lines as well, and it now plays an important part in many industries where temperature and humidity affect the products. This is especially true in the textile and food fields, where already notable results have been reported.

The prospects are that the next five years will see rapid advances taking place in the application of this process, and it is not unlikely that this simple frock can be cut, stitched, and finished up—even by an inexperienced seamstress! Send for your pattern today.

Pattern 4493 is available in sizes 2, 4, 6, 8 and 10. Size 6 jumper takes 1½ yards 36 inches, divided 4 yards contrasting. Illustrations show step-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this pattern. Address: Anne Adams Pattern Dept., Winnipeg Newsprint Company, 175 McDermott Ave., E., Winnipeg.

It is said that the first missionaries who went to Alaska and tried to enlighten the Eskimos by sermons on hell, found that their sermons had the opposite effect. The Eskimos told the missionaries that they were glad there would be a place for them in the hereafter where they could keep warm, and not be obliged to labor hauling wood.

WHY NOT DO IT NOW?

By EBER BRADLEY (The Brandon Bard)

I like to read about Jack Miner. As each author sings his song; But Jack is getting older now. And can't sing as long.

I, too, have passed that deadly gun, As Jack did in days of yore; But I got "Kingville religion" And don't do it any more.

We love to sing of good ole Miner And the birds about his home; But the lesson that he taught us, Has you singing through your dome?

Do you still pack that old shotgun, And spin your hunting lie? Are you still a bumbling game hog, Shooting everything that flies?

And what about that boy of yours, With that deadly gun twenty-two? Have you taught him game protection, As each father ought to do?

Jack Miner had to make that pond For those wild geese and ducks; And cost him his days of labor And several hundred "bucks".

Yet, we have hundreds of Canadians Who are still shooting birds Where they could prevent all shooting And protect our game from harm.

So, you who read this rhyme of mine, If you own a farm or pond, Honor in Jack, make it a game preserve, Ere he heads for the great beyond.

"UNCLE" JACK MINER BANDING MOURNING DOVES

Jack Miner, the Canadian naturalist, says: "The hope for the betterment of this world is more love, the right kind of education, and less point compulsion." He says "If you can get a child to build a birdhouse that child at once becomes a conservationist, because he will not only be interested in the bird, but in the nest, the nestlings, the food, the water, the native lands where at war there has been trouble. Finally their leaders met and decided to live agreeably together in Canada and the United States, and a place for every race within it. First with the Indians, then the French, then with the Continental Europeans. Now the Orientals.

We attended a Japanese Coronation celebration in Vancouver. In their native costumes, they danced and sang and played their instruments.

Japan. But it was a demonstration of loyalty to Canada, their chosen country.

THE CANADIAN ADVENTURE TRIP OF BOB SIM, AN ONTARIO FARM BOY

No. 14 of a Series of 16 Letters

Bob compares Eastern Canada with the West—Enters his train to Vancouver and Victoria, then into the United States and a dash for home. Discovers there is no Canadian Race—there is a nationality.

and loyal races a vote. Unless we place a trust in them, how can we expect a full measure of loyalty in return.

Among Those Not Mentioned

The difficulty in writing these letters is not to find material to write about. So we must leave unprinted the fishing fleet, the cannery factory, our fish dinners, that bowl of clam chowder, an enjoyable day at the Prince of Wales Hotel, the Farm School where British children are brought from the slums to be trained for Canadian farm life and I am sure there is a lot more, like boating, or mountain climbing, or how we washed Manitoba mud off Flora Flora being the Ford. It was her first bath, and she was beautiful.

My next letter will be written from Holstein, but it may not appear in the next issue. Between now and then we are citizens of the United States of America.

SUNDAY SCHOOL LESSON

SEPTEMBER 26

GOD IN THE MAKING OF A NATION

Golden text: Beware lest thou forget the Lord thy God, in not keeping his commandments, and his ordinances, and his statutes, which I command thee this day. Deuteronomy 8:11.

Lesson: Deuteronomy 8:11-20. Devotional Reading: Isaiah 5:1-4.

Explanations and Comments

Forget not Jehovah and What He Has Done for Thee, Deuteronomy 8:13. "Remember Jehovah thy God, and fear him, and keep his orders and regulations and rules.

The law of God is in his heart;

None of his steps shall slide.

(Continued.)

Let, when you have eaten and satisfied yourselves, when you have built great houses to live in, when your herds and flocks multiply and your silver and gold increase, and your land grows larger when you turn proud and forget the Eternal your God (Moffatt's translation).

The picture painted in verses 12 and 13 is that of the landed proprietor. His heart is prone to be lifted up with pride and arrogance, that he may forget his origin and the hardships of his early struggles" (John Gardner).

"I was in a little cottage near Victoria, and a man came to me who lived in it: 'Can you see the castle?' And he replied: 'We can see it best in the winter when the leaves are off.' I asked him, 'What time is it apt to be hid?' The summer bushes hid the castle: the winter bareness revealed it."

"And so it is in our material world, when our earthly treasure that we shall gain in the days of our prosperity, when all our trees are in full leaf. We must pray that man's heart may be as transparent as the leaves, so that through him we may see the midst of material plenty our heart will be with our treasure in heaven" (J. H. Jewett).

The Penitence of Forgetting, Deuteronomy 8:14. "Remember that the writer of Deuteronomy threatens that we shall begin to lose our very prosperity, and all sorts of good things gathered around us, until we shall be overthrown. That is not how we should put it. We should rather say that if we will forget God in our prosperity, we shall lose him, and that loss will be the loss of the love of him which we can, by any of us, take hold of the hand of God." (John A. Hutton).

His Electric Fence

Ontario Farmer Used Hydro Power To Make It Efficient

A farmer in Brant, Ontario, found a new use for the hydro which he recently installed.

He had seen "electric fences" advertised so he ran a wire around the top of the fence of one field and connected it up with the hydro system.

Shortly after, a valuable horse put its head over the fence and he found out how his system worked. It was a hundred per cent. successful in keeping livestock from breaking out of the field.

While the farmer skinned what was left of the horse, he tried to remember how lucky it was that he had not leaned against that fence or some of the kids had not climbed over it before the horse became inquisitive.

Must Be Disappointed

Old Employee At Windsor Castle Has Seen No Ghosts

The retiring Superintendent of the castle at Windsor Castle, John Lamb, states that he has seen no ghosts during his 27 years in office. He entered the castle service, however, too late for the last recorded appearance of the Black Lady. Reputed to be the shade of Queen Elizabeth, the Black Lady is supposed to give warning of impending deaths in the Royal Family. She was last reported to have been seen in one of the corridors of the castle a few days before the death of Queen Victoria.

In Vancouver there is a great Oriental population, Chinese and Japanese. They have their own daily papers, churches, fraternal societies, and occasional social functions. The Chinese lands were at war there has been trouble. Finally their leaders met and decided to live agreeably together in Canada and the United States, and a place for every race within it. First with the Indians, then with the French, then with the Continental Europeans. Now the Orientals.

We attended a Japanese Coronation celebration in Vancouver. In their native costumes, they danced and sang and played their instruments. Japan. But it was a demonstration of loyalty to Canada, their chosen country.

Yet we refuse these industrious England has 1,200,000 horses, compared with 1,900,000 in 1924.

Local News

Mr. and Mrs. Nurcombe returned from three weeks holidays at Vancouver, and were accompanied by Miss Reba Cooper, sister of Mrs. Nurcombe. Mrs. Pattinson and Mrs. Flynn accompanied Mr. and Mrs. Nurcombe on the trip, and all report a delightful holiday. Mrs. Flynn visited relatives at Victoria, and Mrs. Pattinson visited her daughter Jean in Vancouver and her husband, (Mr. and Mrs. Harold Reid).

Stephen E. Walt, 85 years, who recently died in Calgary, was the father of Mrs. Gordon and grandfather of Jack Gordon, now living at Blairmore. At one time he was in the composing room of the Calgary Herald, and he served for many years as organist and class leader of Central United church.

BI-PRODUCTS OF COAL, SUBJECT

Sarnia Rotarians Hear Talk On Possibilities By O. E. S. Whiteside. (Sarnia Canadian Observer)

O. E. S. Whiteside gave an interesting and informative address before the Rotary Club yesterday on "Some Recent and Outstanding Developments of the Chemical Possibilities of Coal." Next to the railway problem, Mr. Whiteside considered one of Canada's major problems to be that of marketing its extensive coal resources. This he attributed largely to long boat or rail hauls from the mines to the points of possible consumption.

What the coal mining industry throughout the world needs more than anything else, Mr. Whiteside told the Rotarians, is markets. The greatest recent step toward expansion in this regard, the speaker said, has been the development of the chemical possibilities of coal.

Mr. Whiteside enumerated some of these developments and gave the Rotarians an insight into the technical processes adopted to obtain more remunerative by-products from coal.

Fred S. Barclay, president of the club, introduced the speaker, and also tendered him a vote of thanks on behalf of the membership.

The seeker after truth has a life

of consciousness this afternoon. He will face the magistrate Friday evening a sadder and wiser man.

John McDonald Appointed to High School Staff

Miss Emma Antle To Public School. Re-Alignment of Classes Sanctioned. Janitors' Duties Cause Discussion.

John McDonald has been appointed to high school staff, salary \$1650, and Miss Emma Antel to public school staff. Effective Oct. 1 Grade VII pupils of W. G. Coleman school will attend Central school and Grade VI pupils now in Central school, living west of Central avenue will attend West Central school. This will alleviate the overcrowding in Grades IV, V, and VI of Central school. Grades VII, VIII, and IX, now constitutes one unit, which is the intermediate school, and the change will save the cost of duplication equipment for that group.

Re-alignment of janitors' duties caused considerable discussion, and Messrs. Patterson, Brennen and Antrobus were given till October 1 to come to a satisfactory agreement as to the division of duties.

Present at the meeting were Trustees Fraser, Fleming, Sharp and Greenhalgh; J. Ford, secretary, and Principal Hoyle. The janitors were called in when their duties were under discussion.

A complete report will be given in our next issue.

Constable Antel hauled a drunk to the cellar this afternoon. He will face the magistrate Friday evening a sadder and wiser man.

Strange Car

Magistrate (a non-motorist): "The officer has stated that you were abusive when you were stopped."

Motorist: "Well, you see I was in a tamarit at the time."

Magistrate: "The make of your car doesn't interest me in the least."

Value of newspaper publicity in the work of the church was given official recognition by the General Synod of the Church of England in Canada at Halifax.

Goodwill is obtained by Journal advertising. And remember—goodwill promotes local business!
